Security Statement

Pace-O-Matic utilizes some of the most advanced technology for Internet security available today. When you access our application using the Elements browser, Secure Socket Layer (SSL) technology protects your information using both server authentication and data encryption, ensuring that your data is safe, secure, and available only to registered Users in your organization. Your data will be completely inaccessible to your competitors, **Pace-O-Matic** provides each User in your organization with a unique username and password that must be entered each time a User logs on. **Pace-O-Matic** issues a session "cookie" only to record encrypted authentication information for the duration of a specific session. The session "cookie" does not include either the username or password of the user. **Pace-O-Matic** does not use "cookies" to store other confidential information, but instead implements more advanced security methods based on a dynamic data and encoded session IDs. In addition, **Pace-O-Matic** is hosted in a secure server environment that uses a firewall and other advanced technology to prevent interference or access from outside intruders.
